

Having worked with many programs, your program's simple interface and focus on delivering functionality without unnecessary bells-and-whistles is brilliant. You have a good product I would recommend to anyone.

Thanks for the great product.

**Bruce Tunget - Drilling
Manager**

ENDEAVOUR ENERGY

Before my present position with a major International Manufacturing and Construction Corporation I spent the better part of a year, on behalf of a Management Consultancy, searching the market for 'logical' Business Process Software.

PROMANADE has grown, through a combination of evolution and customer feedback, to comprehensive Business Process System software, probably the only one in existence, which is truly configured to identify your Business Processes and their relationship with the organisation.

PROMANADE has the ability to provide a quick and tangible result from minimal input, the ability to provide the ultimate simplification of the most complex interrelationships of processes and the ability to be easily adapted as the organization or modus operandi changes.

I would strongly recommend that anyone who is interested in knowing what they are doing, why they are doing it, if it is necessary to do what they are doing and if what they are doing is being done effectively and efficiently they should visit the website, download the demonstration software and "try to prove me wrong".

**Keith Morrey - Project Quality
